

ProFacto A/S

Profile

ProFacto A/S delivers business systems based on Microsoft Dynamics NAV.

ProFacto A/S has highly trained Navision consultants with analytic business understanding and many years of experience in building system architectures for the Danish corporate sector.

In addition to the wide variety of Navision competences, ProFacto A/S has specialist competences in production planning and assists Microsoft on a current basis in the development of future manufacturing control tools in Navision.

SELECTING THE RIGHT PARTNER

Selecting the right Navision partner is a matter of trust. You can achieve this by focusing on a few important parameters:

- Number of years of Navision experience
- Training and education of each consultant
- Documentation of the development work
- More consultants familiar with your solution
- Compliance with agreements
- Microsoft certified partner

These parameters are part of the fundamental principles for ProFacto A/S today, tomorrow and forever.

ProFacto means professional services. It means that when you invest in a high-end Navision system, you also get high-end consultants. We deliver standard solutions on a large scale. Furthermore, we make modifications "alongside the standard" to the widest possible extent. In this manner we ensure a smoother process for your future upgrades.

With the right Navision partner comes the ability to continuously update your competitive power by means of the latest technology. A decisive factor in a competitive business environment.

Cooperation with ProFacto A/S gives you consultant assistance at the highest level based on the most recent knowledge, technology and best practice.
